Corrugator Roll Stand Brake Upgrade Packages

Customized packages specific to each corrugator for drop-in brake replacements.

Fast and easy installation.

Immediate return on investment with increased efficiency, productivity and reduced waste.

Minimal brake maintenance with tool-LESS pad changes. Change every pad on your brake in seconds!

Consistent Quality is impossible without Consistent Tension

Roll Stand Brake & Tension Control Specialists

Drop in replacement products for your Corrugator!

Built Specific for YOUR Corrugator

Customized bolt patterns, back plates, and sizing, and shipped with all necessary parts specific to each corrugator in the industry making them drop in replacements when upgrading. Ready for immediate installation.

The V Pad

A game changer in the industry: No tools required to change every pad on your V-Brake. Just snap-out your old pads and snap-in the new ones. In only seconds every pad is changed. Obtain immediate productivity increases with the V Pad.

Increased Cooling Capacity

The V-Brake succeeds where others fail. Even with high-torque at low speeds the V Tension Brake provides precise control. The V-Brake cover can also be fitted with a built in fan to provide most corrugators even greater cooling capacity.

Wide Torque Range

From 1.3 to 10,692 in-lb the V-Brake is available in four different models to meet the needs of practically any application. Get the performance you need with the V Tension Brake.

High Heat Dissipation and Thermal Capacity Discs

Montalvo's signature high thermal capacity discs combined with a patented fin design provides maximum heat dissipation to keep your V-Brake operating at the highest quality.

Bi-Directional Operation

Unwind from the top or bottom of your roll.

Increase the capabilities of your Corrugator today by making them more efficient, more productive, and more profitable with the Montalvo V Brake!
